

WHAT'S FEDORA?

Fedora is an operating system and a development platform based on Linux that is free to use, free to modify, free and legal to redistribute, and free from potentially damaging software patent encumbrances.

Fedora is built from the latest technologies from the free software world, and assembled by a community of users and developers who are passionate about providing and maintaining the best free software distribution in the world.

WHAT'S THE FEDORA PROJECT?

The Fedora Project is a Red Hat sponsored and community supported open source project. Our goal is the rapid progress of free and open source software and content. The Fedora Project makes use of public forums, open processes, rapid innovation, meritocracy, and transparency in pursuit of the best operating system and platform that free software can provide.

FREEDOM.

FEATURES.

SOME OF OUR APPS

Here's a little introduction to some of the apps that are available in Fedora:

LIBREOFFICE WRITER

Writer is arguably the most powerful open source word processor.

LIBREOFFICE IMPRESS

Like many other presentation programs, Impress supports 2D & 3D clip art, special effects, animation & a variety of file formats.

LIBREOFFICE CALC

Calc is the intuitive, flexible, yet powerful spreadsheet program in the LibreOffice suite.

NETWORK MANAGER

NetworkManager provides excellent wireless network management and sharing support.

HAMSTER

A time-tracking tool that keeps you on task and analyzes how you spend your time.

GNOME ACTIVITY JOURNAL

Walk through an automatic log of the files & activities you've worked on, day-by-day.

GNOTE

Unclutter your life and build a personal database with Gnote, the desktop sticky notes application.

INKSCAPE

Create stunning vector artwork using Inkscape, the open source vector graphics app.

FEDORAPROJECT.ORG/USING

A FREE OPERATING SYSTEM

Fedora comes in both live media and installable DVD formats for 32-bit & 64-bit machines. Its apps are selected to cater to a broad spectrum of use, from home and business use to system administration and software development. No matter who you are, Fedora will provide you with the best free software to meet your needs.

The default Fedora desktop features the GNOME 3 desktop. It is easy to use, simple and suitable for everybody. You are free to change the themes, install extensions to customize it to your liking, or even to replace it with a different desktop environment altogether.
