fedora *f* 12
RELEASE NOTES

FREEDOM. FRIENDS. FEATURES. FIRST.

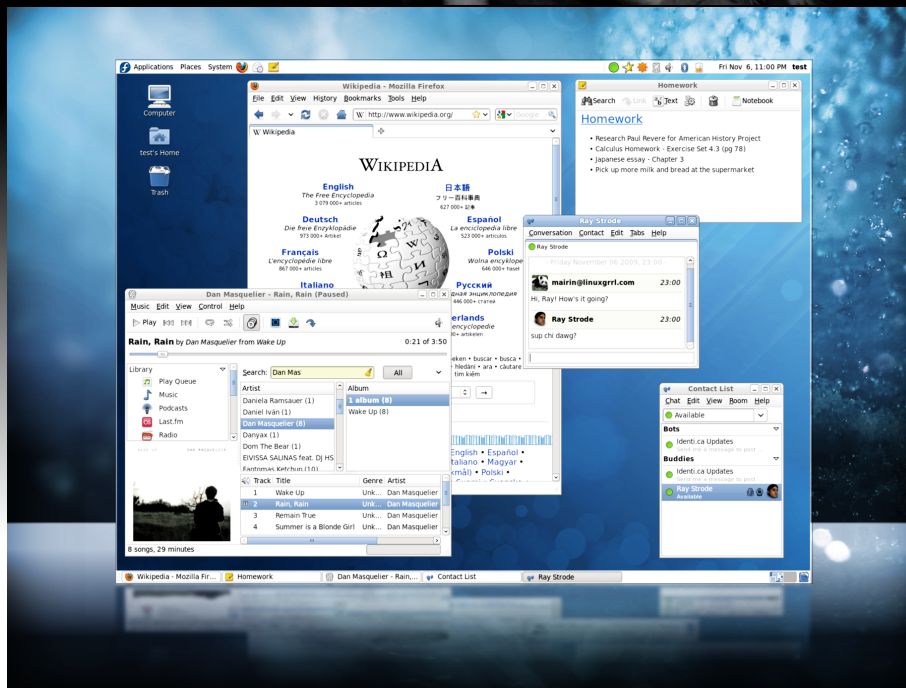

FEDORA: UNITING COMMUNITY, TECHNOLOGY & FREEDOM.

Fedora is a Linux-based operating system that brings the latest in free and open source software to your desktop, laptop and server. Fedora is built by people across the globe who work together as a community: the Fedora Project.

Fedora is free to use, modify, and distribute, and includes software that helps you work, play, organize, and socialize.

HOW DO I GET STARTED?

Intrigued? Want to give Fedora 12 a try?.

You can download a LiveCD regardless of what operating system you're running. This will give you a working version of Fedora, complete with common applications, all running off your CD drive - your hard drive won't be touched at all. And when you're ready, installation is just a click away.

Get Fedora today at:

■ **get.fedoraproject.org.**

If you're running Fedora 11, upgrading is easy. Refer to our handy documentation for help:

■ **docs.fedoraproject.org**

HELP MAKE FEDORA!

Want to join the Fedora community and help us make the best Linux distribution even better? Our diverse worldwide community welcomes contributors of all types. From artists to marketers to coders to testers to writers to translators and more, you can get involved.
